

Hi,

As you are aware we have joined forces with Minds & Machines LLC (MMX) to provide registry services for a number of top-level domains. Today we are pleased to announce that our onboarding process is open and you can now gain access to your new account and the OT&E environment.

Onboarding and Your (New) Account

As an existing Nominet customer we have created an account for all of the MMX top-level domains you have previously signed up for. If you are using the same email address please continue to use your existing password. If you are using an alternative email address you will be required to reset your password.

When logging into your [online services](#) account you will now see a separate tab for the MMX top-level domains.

Within this section you will be able to:

- manage contacts for this account
- manage IP addresses for EPP
- manage IP addresses to connect to the OT&E environment

Transition timeline

From mid-September we will start to transition the MMX top-level domains. We will be contacting you via email throughout the transition period to keep you up to date with timings and specific transition windows.

To enable a smooth transition we would strongly encourage you to use our OT&E environment to ensure your connection is set up and working correctly prior to each of your transitions. For further information please visit [registrar resources](#).

Our support teams are available to assist you through the transition process. You can contact our team on +44.1865332483 or via [email](#).

We look forward to working with you on this transition and as we support these domains moving forward.

Kind regards,

Helen Tomes

Director of Marketing and Service Delivery
